Program Plastenika

strukcije plastenika se izrađuju od :

- ih cijevi;
dno poinčanih
vi;
će poinčanih cijevi

A	ŠIRINA (cm)	VISINA (cm)	DUŽINA MIN-MAX (cm)	BOČNA VENTILACIJA	FOLIJA	POLIKARBONAT (4 mm)	VISINA STUBA (cca - cm)
5	350	200	500-1000				100
0	500	250	1000-30000				120
5	550	300	9090-32720				150
3	630	300	9520-39680				160
4	640	350	15620-46870				170
0	800	380	12500-62600				180

oguća je i izrada plastenika dimenziono različitog od tipskih plastenika pobrojanih u gornjoj tabeli

卷之三

ITC - P63

A close-up photograph showing the intricate network of steel beams and glass panels that make up the interior of the Reichstag dome's glass roof. The perspective is looking upwards through the structure.
